RVC comments, based on 2017 reporting

The Regional Verification Commission for Measles and Rubella Elimination (RVC) welcomes recent steps taken to improve vaccination coverage and encourages continued activities to further increase and sustain high routine vaccination coverage at all administrative levels. Surveillance performance and sensitivity need to be strengthened and better documented.

Surveillance performance indicators and targets

- Rate of discarded cases: at least 2 discarded measles or rubella cases per 100 000 population
- % cases with adequate laboratory investigation: ≥ 80%
- % origin of infection known: ≥ 80%
- Rate of viral detection: ≥ 80%
