

HEN Report Uptake Summary

HEN publishes synthesis reports that aim to support public health decision-makers in the WHO European Region to formulate health policies based on the best available evidence. To understand how each HEN synthesis report is disseminated, shared, discussed and used, and then contributes to public health decision-making, the HEN Secretariat analyses the uptake of each report. The Secretariat assesses the short- and long-term (up to one year) reach of each HEN report and summarizes the findings in a brief format.

Title	HEN 57. What is the evidence on existing policies and linked activities and their effectiveness for improving health literacy at national, regional and organizational levels in the WHO European Region?
Published in	WHO Regional Office for Europe ; NCBI Bookshelf
Authors	Gillian Rowlands, Siân Russell, Amy O'Donnell, Eileen Kaner, Anita Trezona, Jany Rademakers, Don Nutbeam
Analytics covering	<i>June 2018 to August 2019</i>
Data source	WHO Regional Office for Europe, NCBI Bookshelf, Altmetric, Google

Presented at the following events

- 68th session of the WHO Regional Committee for Europe, 2018
- [Towards holistic health literacy policies in Europe; results of a recent WHO evidence synthesis](#) [presentation]. 11th European Public Health Conference. Winds of change: towards new ways of improving public health in Europe, Ljubljana, Slovenia, 28 November–1 December 2018
