

HEN Report Uptake Summary

HEN publishes synthesis reports which aim to support public health decision-makers in the WHO European Region to formulate health policies based on the best available evidence. To understand how each HEN synthesis report is disseminated, shared, discussed and used, and then contributes to public health decision-making, the HEN Secretariat analyses the uptake of each report. The HEN Secretariat assesses the short- and long-term (up to one year) reach of each HEN report and summarizes the findings in a brief format.

Title	HEN 45. What is the evidence on the reduction of inequalities in accessibility and quality of maternal health care delivery for migrants? A review of the existing evidence in the WHO European Region
Published in	WHO Regional Office for Europe Website , PubMed Bookshelf
Authors	Ines Keygnaert, Olena Ivanova, Aurore Guieu, An-Sofie Van Parys, Els Leye and Kristien Roelens
Analytics covering	<i>September 2016 to October 2017</i>
Data source	WHO Regional Office for Europe, National Center for Biotechnology Information Bookshelf, Altmetric, Google, Publish or Perish academic citation search, Web of Science cited reference search

Presented at the following events:

- 66th session of the WHO Regional Committee for Europe
- Summer school on Refugee and Migrant Health
- European Advisory Committee on Health Research (EACHR) 2017
