## **Progress reports**

This document contains a correction to the section “Progress report on the implementation of the Consolidated Action Plan to Prevent and Combat Multidrug- and Extensively Drug-Resistant Tuberculosis in the WHO European Region 2011–2015”.

The final sentence of paragraph 8 should read:

“Despite having tripled since the endorsement of the Consolidated Action Plan, coverage of second line drug susceptibility testing is still only 9%, proving that up to 12% of all MDR-TB cases are extensively drug resistant.”
