

## HEN Report Uptake Summary

HEN publishes synthesis reports that aim to support public health decision-makers in the WHO European Region to formulate health policies based on the best available evidence. To understand how each HEN synthesis report is disseminated, shared, discussed and used, and then contributes to public health decision-making, the HEN Secretariat analyses the uptake of each report. The Secretariat assesses the short- and long-term (up to one year) reach of each HEN report and summarizes the findings in a brief format.

Title	<b>HEN 60. What quantitative and qualitative methods have been developed to measure health-related community resilience at a national and local level?</b>
Published in	<a href="#">WHO Regional Office for Europe</a> ; <a href="#">NCBI Bookshelf</a>
Authors	Jane South, Rebecca Jones, Jude Stansfield, Anne-Marie Bagnall
Analytics covering	<i>October 2018 to November 2019</i>
Data source	WHO Regional Office for Europe, NCBI Bookshelf, Altmetric, Google
