The WHO Regional Office for Europe uses date of rash onset to classify cases in time; in tables 1 to 4 cases are classified by the month when they occurred. These monthly totals may look different if other time-related variables (e.g. date of reporting) are used. Therefore, Member States and other partner agencies producing similar summaries using dates other than date of rash onset may report different numbers.

Monthly summary table 2: Reported rubella cases for the 12-month period May 2012 — April 2013 (data as of 11 June 2013)

Data source: Monthly aggregated and case-based data reported by Member States to WHO/Europe and ECDC/TESSy

¹ Source: "World Population Prospects: The 2010 Revision", New York, United Nations and updates provided by Member States.

² Imported and import-related measles cases are included in the total.

³ Unless specified as lab confirmed or epi-linked, cases are classified as clinically compatible.

* Member States reporting aggregated measles data.

Indicators not meeting target and countries not reporting monthly measles data are highlighted in red; "-" = data not submitted.

Monthly summary table 4: Classification, reporting and performance of rubella, January-April 2013 (data as of 11 June 2013)

Country	Total Population ¹	Incidence per 1 million population (Jan-Apr 2013)	Total rubella cases	Classification				Imported cases	Reporting			Surveillance Indicators <small>(Please click here to refer Annex 5 of MR Surveillance)</small>
