

Links to regional and global immunization data

This document is intended to support immunization programme managers and staff in their efforts to secure sustainable funding for immunization.

HOW TO USE THIS DOCUMENT

The details of government expenditure on immunization can be used to advocate for further investment. When comparing with expenditure in other countries this argument may be further strengthened.

This document provides links to regional and global immunization data which you can compare with the data from your own country.

Use this document when preparing a financial profile of your immunization programme (please refer to “How to prepare a financial profile of your immunization programme” on www.euro.who.int/immunization-advocacy-library).
