

SUPPORT FOR HEALTH WORKERS RESPONDING TO COVID-19

Clinical and Health Interventions Team

What do we do?

To fight the COVID-19 pandemic, WHO provides crucial support and expert guidance to front-line health workers who care for patients with COVID-19, as well as health policymakers. From remote training, expert guidance and advice, to securing access to quality medicines, health products, laboratory supply and medical equipment. WHO stands with doctors, nurses and all health workers to save lives and stop the pandemic.

The Clinical and Health Interventions Team has five functional areas

Clinical management

Medical supply chains

Infection Prevention and Control

Essential Health Service Delivery

Hospital Readiness

What do we offer?

We offer country-level clinical support, such as:

- Tailored virtual trainings for health workers
- Open WHO courses
- Guidance documents and tools
- Provide technical advice on related topics

Virtual Trainings

Upon request we can organize tailored webinars for health workers on

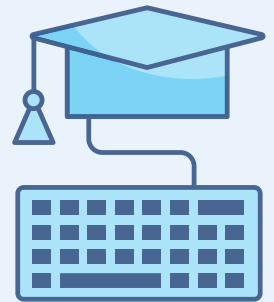

- Infection Prevention Control (IPC)
- Clinical management of COVID-19 patients with a focus on a wide range of topics such as antimicrobial resistance, COVID-19 and children, COVID-19 and pregnancy and more.

Trainings are available in English and with simultaneous translation to Russian and potentially other languages.

OpenWHO courses

WHO offers free, self-study COVID-19 online courses on

- Clinical management of patients with COVID-19
- Infection Prevention and Control for COVID-19
- Hand hygiene
- Long-term care facilities in the context of COVID-19
- How to put on and remove personal protective equipment
- and more....
