

HEN Report Uptake Summary

HEN publishes synthesis reports that aim to support public health decision-makers in the WHO European Region to formulate health policies based on the best available evidence. To understand how each HEN synthesis report is disseminated, shared, discussed and used, and then contributes to public health decision-making, the HEN Secretariat analyses the uptake of each report. The Secretariat assesses the short- and long-term (up to one year) reach of each HEN report and summarizes the findings in a brief format.
